

Reusing of Waste Material

Trombay Chemical Team, reused scrap Detection Electrode from old abandon moisture meter to currently in use moisture meter. This has saved the cost of Procuring new electrode Worth Rs. 80 thousand.

Great work!

Benefits:

1. Less pollution as reuse of waste material.
2. Saving of Rs. 80 thousand cost by reuse of electrode.
3. Saving of time and Efforts for Procurement of new material.

Before

After

Saving lives!

A pigeon got stuck inside the nylon net provided to the operating area of PT14 Butterfly valve area in Bhivpuri Power House. Mr. Kailash J Lashkare from Headworks, saw the struggling bird and rescued it from the net. He fed water to the pigeon. After getting some strength bird flew away.

Great work!

Benefits:

Mr. Kailash has contributed in conserving our planet by saving the surrounding wildlife through his awareness!!

Best Out of Waste

We generally dispose scrap, papers etc. after use. Ms. Paramira Das from Khopoli thought otherwise and used them in possible way and used the waste paper for cardboard and package box for practical learning of kid.

Great work!

Benefits:

1. Less pollution as reuse of waste material.

CGPL- CSR constructs 4 Rain Roof water harvesting structures under Project “ Amrutdhara”!

CGPL- CSR team has constructed 4 Rain Roof water Harvesting Structures (RRWHS) under Project “ Amrutdhara”. Out of 4 structures, 3 structures are constructed in the villages for the poor SHG members, whereas one RRWHS has been constructed in the Primary school of village Motikhakar. The capacity of RRWHS which has been built for the SHG members is 15000 litres each and the capacity of the school RRWHS is 50,000 litres.

This endeavour was very much appreciated by the village panchayat.

Great work CGPL!

Benefits:

1. Water saving and conservation
2. Cost saving
3. Reducing efforts of the community people
4. Minimization of wastage due to run off

Medicinal gardening at home!

A strong immune system could be the perfect solution to tackle COVID-19 therefore I planted some medicinal plants like Tulshi, Giloy, Aloe-vera in the hostel field at MPL. I also planted rose plants for beautification. I used compost fertilizers for its fast cultivation. It gives me immense personal satisfaction to see that all the plants are well grown & for the last 3 months other persons in the field are also taking benefits from these plants to boost their immune system.

Great initiative!

Benefits:

Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times. Plants synthesise hundreds of chemical compounds for functions including defence against insects, fungi, diseases, and herbivorous mammals.
